OUR CORE VALUES

PACKAGING YOUR BRAND PERFECTING YOUR BEAUTY

We do not just package products,we carry the soul of your brand and the essence of its sensory experience.

We don't just make containers.We shape your brand's first impression and deliver its emotional code.
Packaging is the bridge between your formula and your customer.
We ensure every drop is delivered,gently and precisely to the skin. With every twist, press, and click, we become the translator of your brand's culture, the first point of touch in the user experience, and the quietest yet most loyal customer service representative.

BRIEF INTRODUCTION

Sheack Packaging is an innovative packaging solution provider with rich industry experience, focusing on the research, development, design, manufacturing and global supply of high-quality cosmetic packaging.

We serve beauty, personal care, skincare and cosmetic brands, helping customers turn creative concepts into reliable, mass-producible packaging products.

Our capabilities cover industrial design, mold development, precision injection, quality control and export delivery. We are committed to becoming a long-term partner for brands, not just a supplier of containers.

INNOVATION WITH PURPOSE

We Don't Chase Trends We Create Them

Every pump, bottle, or jar is a crafted harmony of function and beauty, designed to elevate your brand and make a lasting impact.

ORIGINALITY IS OUR SIGNATURE

From custom innovations to bold reinventions

we blend creativity with technical mastery to help your brand stand apart.

THE COURAGE TO BE DIFFERENT

Standardized Components

We firmly believe that true innovationis not a castle in the air-standardized components serve as the universal language for industry communication, the starting point of quality trust, and the "gene chain" for breakthrough innovation.

Ingenious Breakthroughs in Micro-Process Technology

From controlling the pressing stroke error of pump heads within 0.1mm to conducting tens of thousands of ergonomic tests on the palm-fit curvature of bottle bodies, our precision injection molding technology ensures that every contact point delivers "precise feedback" and "comfortable grip." For example, a vacuum bottle customized for a premium skincare brand extends the active ingredient freshness period by 30% through a double-layer sealing structure design. Meanwhile, its matte texture and magnetic opening/closing design transform each use into a "ritualistic experience."

Scenario–Based Functional Reconstruction

The "leak-proof lock bottle" developed for outdoor skincare scenarios features a patented snap-on cap structure that passes a 50kPa pressure test to ensure no leakage during intense shaking. Its stand-able cylindrical bottle design solves the pain point of "nowhere to place" in camping scenarios. The "temperature-sensitive color-changing baby bottle" designed for maternity and infant brands incorpo-rates thermosensitive molecules in the bottle mate-rial, which automatically display warning patterns when the liquid temperature exceeds 37°C, safe-guarding parenting safety through innovative details

Sustainability as Standard

Green is our baseline. From eco-materials to cleaner processes we believe packaging should serve your brand and the planet.

Raw Material Innovation: Selection of Environmentally Friendly Packaging Materials

Biobased materials: Packaging bottles/jars are made from renewable plant-based raw materials such as sugarcane bagasse and com starch to reduce reliance on petro-leum-based plastics (e.g.post-consumer recycled (PCR) plastic accounts for ≥30%).

Process Upgrades: Creating Low–Carbon and Clean Production Chains

Closed-loop recycling system: Collaborate with professional environmental protection agencies to establish a "consumer empty bottle recycling-sorting and cleaning-crushing and reprocessing" chain (e.g., caps and bottle bodies are sorted for recycling and remelted into new packaging materials), with a target packaging recycling rate of≥50%).

Functional Integration: Balancing Environmental Value and User Experience

Multi-functional eco-design: Launch "multi-use" packaging (e.g., essence bottles with replaceable inner cores, bottle caps that double as measuring tools) to extend packaging service life: eyeshadow palettes and powder boxes adopt magnetic detachable struc-tures to facilitate refill replacement and reduce overall disposal.

Our Global Footprint since Inception

Since its establishment, our company has forged partnerships with high-quality clients from five countries across five continents. Our business footprint encompasses North America (the United States), South America (Brazil), Europe (Spain, the Czech Republic), and Oceania (New Zealand).

By providing localized services, we are committed to meeting the diverse needs of our global customers and continuously expanding the boundaries of our international market presence.

Content

As a professional cosmetics packaging materials manufacturer, we possess leading color mixing technologies and rich production experience, enabling us to precisely meet any color customization requirements.

Whetherits the trendycolors at the forefront of fashion

The exclusive colors unique to the brand, or the personalized colors full of creativity, we can ensure the accuracy and consisteney of colors through our strict color management system.

From the light and soft macaron color seriesto the richand vivid high-saturation tones, the ever-changing color options can not only meet the style positioning of different brands but also endow products with unique visual charm, helping brands stand out in the market.

We use colors as our brush to outline a unique andgorgeous appearance for each cosmetics packaging material,making colors the most eye–catching business card of the brand.

Unrivaled Packaging

Lotion Pump with Rachet and long arm

24–410 and 28–410
Dosage:2ml+1–0.2
Material: PP,PE,
with metal Spring
Rachet, long arm MOQ:10k

Differentiated Advantages

Child proofing

The ratchet mechanism not only controls dosage precisely but also acts as a safety feature. Its unique meshing requires specific force and skil to press, making it difficult for children. Ideal for families with kids, it prevents lotion waste and accidents caused by playful behavior.

Space Adaptabilty

The long arm allows the pump to fit various containers, especially tall or narrow ones.In tight spaces. it can be adjusted flexibly, enabling easy dispensing without environmental constraints.

Applicatio Scenarios

Lotion Pump with Rachet

24–410 and 28–410
Dosage:2ml+/–0.2
Material: PP PE, with metal Spring
Rachet,long arm MOQ:10k

Advantages

Prevention of Misoperation

The ratchet device enables the pump head to maintain a fixed position after being pressed, and it will not be easily extruded accidentally. This feature is particularly important for products that needto be carried in bags or suitcases,effectively preventing liquid leakage due to extrusion during the carrying process.

Strong Durability

The ratchet structure is usually quite sturdy and can with standmultiple pressing operations, reducing the-possibility of damage to the pump head caused by frequent use and extending the service life of the product.

Characteristic Application Scenarios

In the Skincare P uct Field

Skincare products often be carried around. The r ation prevention design lotion pump can preven during the carrying proc tecting bags and other i from contamination.

In Household Cle Products

It can keep the product clean and hygienic, prev growth of bacteria.

TRIGGER

All Plastic Trgger/Rachet

28–410
Dosage:1.2–1.4ml/T
Material: PP,PE
All plastic / Recyclable /Foam /Rachet

Advantages

Recyclability

The all-plastic material can be highly recycled and reused, which conformsto the environmental protection trend and helps enterprises establish agreen image.

Lightweight

Reduces the overal weight of the product, making it easy to carry and operate, and reducing the fatigue during use.

High Cost-effectiveness

Compared with materials such as metal, the production cost is low, making the product more competitive in terms of price.

Good Insulation Performance

In electrical equipment or occasions requiring insulation,it can effectively prevent electric shock and ensure safety

Strong Corro-sion Resistance

It can withstand a v
ety of chemical su
stances, and is s
for scenarios v
comes into c

Trigger with Child Lock

28–410
Dosage:1.2–1.4ml/T
Material:PP,PE,metal spring
Child Lock

Core Advantages

Safety Protection

The all-plastic material can be highly recycled and reused, which conformsto the environmental protection trend and helps enterprises establish agreen image.

Precise Control &Waste Reduction

When locked, the sprayer is inoperable, avoiding acci-dental spills of costly products.Unlocked, it offers accu-rate dispensing, perfect for items like sunscreen and medicine.

Brand &Compliance Benefits

Child locks enhance brand trust, especially for baby and home care products. They meet international regulations, facilitating global market access.

Additional Value

Differentiated Marketing

By emphasizing "child-friendly" features appeals to family-oriented consumers. The design also reduces waste, aligning stainability trends.

Upside Down Sprayer Trigger

28–410
Dosage:1.2–1.4ml/T
Material:PP,PE,metal spring
180 degrees rotation

Typical Applications

Household Cleaning
Effortlessly tackles high walls, furniture undersides, and other concealed spaces.

Automotive Care
Ideal for detailing interior gaps, headliners, and hard-to-reach areas during vehicle maintenance.

Personal Care
Perfect for on-the-go products like dry shampoos or body sprays, usable while lying down or during physical activity.

Horticulture
Precisely targets under sides of leaves and plant bases for efficient fertilization and pest control.

T03

Core Advantages

Optimal Liquid Utilizatio
Enables complete emptying of containers via inverted spraying, minimizing waste of premium liquids (e.g., essential oils, specialty cleaners)

Multi-Angle Flexibility
Works seamlessly in any orientation, reaching ceilings, crevices, and other hard-to-access areas conventional triggers cannot.

Hygienic Design
Reduces contact between the nozzle and environment, minimizing contamination risks and extending product shelf life.

Market Differentiation
Unique inverted functionality creates a competitive edge, enhancing brand appeal and consumer attraction.

Continuous sprayer Trigger

0.3mm Diameter spray nozzle
PET bottle
Continuous spraying
160ml–680ml

Core Advantages

Efficient Coverage

Delivers continuous, stable atomization for rapid and even coverage of large surfaces, reducing the need for repeated application.

Time and Effort Saving

Enables extended spraying with a single activation, eliminating frequent pressing. Ideal for large-scale tasks, it minimizes hand fatigue.

Precise Control

Spray patterns and flow rates are adjustable, allowing for both wide-area spraying and detailed applications, thus reducing liquid waste.

Versatile Compatibility

Works with various liquids, including water-based solutions, emulsions, and paints, and fits different container types, ensuring flexible use.

Typical Application Scenarios

Decoration and Coating

Used for spraying walls and furniture, ensuring uniform coatings and improving both efficiency and finish quality.

Horticulture

Facilitates large-scale irrigation, fertilization, and pesticide spraying, providing comprehensive coverage for plants

Industrial Production

Applied in coating electronics,anti-rust treatments for automotiv parts,and metal painting,guaranteeing high-quality spraying and production efficiency.

T04

Personal Care

Ideal for hairsprays, setting sprays, etc., delivering an even and natural application experience.

Cleaning and Dis–infection

Enables quick cleaning and disinfection of large spaces or surfaces

High–Viscosity MiniTrigger Sprayer

Break Through
Formulation Limits for
Sunscreen & More

Key Advantages

Unmatched High-Viscosity Compatibility

Unlike most mini triggers on the market, it successfully-sprays thick formulations(eg ,sunscreen)with a fine, evenmist, solving the core painpoint of limited application for high-viscosity products.

Strong Brand Differentiation

It’s unique ability to handle high-viscosity formulas creates a competitive edge, helping your brand standout in categories like sunscreen, where traditional mini triggers fail to deliver

Reliable &Durable Performance

Crafted with high-quality components. it ensures consistent spray output and long-term durability, preserving the integrity of your milky formulations while offering a smooth user experience

CRIMP PUMP

Crim Pump

Dosage: 0.09 ± 15%ml/T, 0.13 ± 15% ml/T, 0.05 ± 15%ml/T, 0.08 ± 15%ml/T
For Fragrance
Material: PP, PE, metal spring

Core Advantages

Excellent Sealing Performance

Provides a secure, leak-proof seal to ensure contents are well-preserved. Compared to some threaded pumps, it is less likely to loosen over time, reducing the risk ofleakage and evaporation

Sleek Aesthetic Design

Some pumps feature a seamless, high-end appearance without obvious threads, enhancing the visual appeal of product packaging and elevating the overall premium feel of the product. This makes them ideal for high-end per fumes, cosmetics, and other products with strict packag-ing aesthetics require ments.

Portability &Ease of Use

Compact and lightweight, it allows one-handed opera-tion, fits various containers, and is convenient for both on-the-go and home use.

Durable Build

Constructed from high-strength materials, it offers ex-cellent wear resistance and long-term reliability even with frequent use.

Special Application Scenarios

Cosmetics Industry

Widely used in packaging for perfumes, moisturizing sprays, and other beauty products. Their elegant appearance and superior sealing performance help enhance product attrac-tiveness and quality perception, while also ensuring convenient use for consumers.

Pharmaceutical Industry

Suitable for packaging certain external medicinal products, such as spray-form disinfectants and antipruritic lotions. They enable patients to accurately dispense medication, while their robust sealing ensures drug quality and stability.

AIRLESS BOTTLE

420ml Large size Airless bottle

New design with recognition
28–410 Pump, one hand easily pressing
For personal care, homecare Material: PP, PE
Replaceable, eco–friendly

Core Advantages

Large-capacity design that balances practicality and portability

The 420ml large capacity is suitable for products requiring frequent use or for home/professional scenarios(-such as shampoo, body wash, body lotion,etc.), reducing the hassle of frequent restocking. The bottle body is usually ergonomically designed for comfortable grip, making it easy to operate with one hand even for large capacities, balancing "large size" and "usability".

AII Plastic Airless bottle

15ml/30ml/50ml
For skincare personal care, homecare
Material: PP, PE
All plastic

Core Advantages

Safe and Environmentally Friendly Materia

Made entirely of plastic, the material is stable, non-toxic, and safe. Some products are crafted from recyclable materials, aligning with current environmental protection concepts. This not only reduces environmental pollution but also meets brands'needs for sustainable development.

Exceptional Anti-Oxidation Sealing

The All-Plastic Airless bottle features a unique vacuum design, ensuring no air remains inside. It effectively isolates the contents from oxygen, light, and external contaminants, preventing oxidation, spoilage, and microbial growth. Compared to traditional open-mouthed bottles, it significantly extends the product shelflife and better preserv

A02

Airless bottle with rotating nozzle eCO-friendly replaceable innerbottle

15ml/30ml/50ml
For skincare personal care, homecare
Material: PP,PE
All plastic

Core Advantages

Eco-Friendly and Sustainable

The replaceable design allows users to retain the outer bottle and only replace the inner refill once the product is finished. This reduces packaging waste and environmental impact, aligning with modern eco-conscious trends and helping brands build a sustainable image

Extended Product Shelf Life

Airless bottles utilize a vacuum system to prevent air from entering, minimizing product contact with oxygen and thus avoiding oxidation and spoilage. This significantly extends the shelflife. For example, active ingredients like vitamin C in skincare products are prone to decomposition upon exposure to oxygen. Packaging them in replaceable airless bottles helps maintain their activity and efficacy.

All plastic

30ml/50ml/100ml
For skincare personal care and skincare
Material: PP, PE Replaceable
All plasti

Core

Advantages

Eco-Friendly and Aligned with Circular Economy

Highly recyclable plastic material (subject to classification standards); using PCR(post-consumer recycled plastic) for the outer bottle can reduce carbon footprint by over 40%.

Lightweight and Shatter-Resistant

Made entirely of plastic, it is over 50% lighter than glass/metal, reducing carbon emissions during transportation while being fully shatterproof, ideal for bumpy scenarios (e.g.,travel,outdoor use) to prevent product leakage or waste from bottle damage.

Strong Chemical Compatibility Stable Ingredient Protection

Uses inert plastics like PE and PP, resistant to acids and alkalis, safely storing high-active ingredients (e.g., retinol, salicylic acid, benzoyl peroxide) to avoid reactions with the container and ingredient degradation.

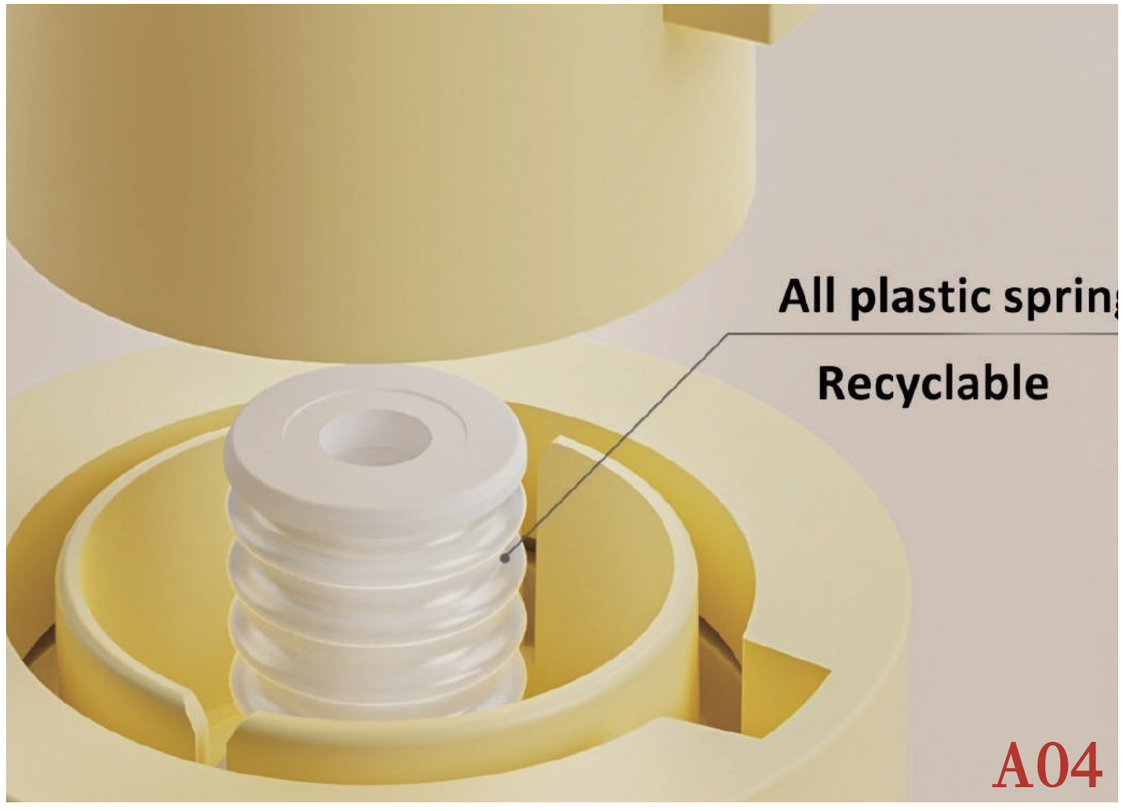

Special Application Scenarios

Fast-Moving Beauty

Affordable skincare and makeup bases use all-plastic bottles to reduce costs, with vacuum design extending shelflife and enabling precise dosage control.

Medical Care

Topical medications and pet pharmaceuticals use shatter-resistant all-plastic bottles for light and oxygen isolation, with pumps ensuring sterile access and precise dosing.

Rotary Hidden Vacuum Bottle

30ml and 50ml

Two Disruptive Experiences Core Design: A Sterile Preservation System That "Disappears"

Ideal for Cleanliness Enthusiasts &Frequent Travelers: 360 Leak-Proof&Sterile Protection

After locking via rotation, the bottle remainscompletely leak-proofeven when inverted, keeping the nozzle pristine. It fits seamlessly into bags fortravel or daily commutes, putting an end to the leakage troubles of traditional pump bottles.

Luxury-Grade Ritual:Sophistication at Your Fingertip with Every Rotation

The bottle emits a subtle "click" sound when rotated, evoking the precision of a luxury watch mechanism; Its minimalist design resembles a work ofart.Perfect for gifting, it exudes an air of mystery and elegance.

Precision Structure with Rotary Transformation

When not in use, the dispensing nozzle is concealed within the bottle cap, forming a fully enclosed vacuum environment that eliminates contamination; With a-turn rotation of the cap, the piston-style nozzle automatically pops up for effortless dispensing-the ritual of transitioning from concealment to use mimics the opening ofa precision instrument.

Classical Vacuum Bottle

100% air–tight freshness
multi–sizeadaptability

Advantages

Ultimate freshness & efficacy retention

100% airtight design completely blocks air andexterna contaminants, efectively preventingoxidation and spoilage of active ingredients (e.g..serums, essential oils)to maximize product efficacyand freshness.

Versatile capacity options

15ml/30ml/5oml cover diverse needs -15 ml for samples, travel or trials; 30 - 5oml for daily short-to. medium-term skincare, balancing practicality and portability.

Classic & durable

Mature traditional vacuum structure. Timeless designfits various skincare scenarios and never goes out of style.

Standout Doble–Wll PET Vacuum Bottles

Eco–Friendly Packaging for Brand Differentiation
80ml and 120ml

Key Advantages

Unique Visual Appeal

Double-wall PET creates a distinctive wrinkled innerliner, especially eye-catching for colored formulations to grab consumer attention.

Effective Brand Differentiation

The one-of-a-kind texture acts as a unique brandmarker, setting your products apart from competitors in the market.

Eco-Friendly Material

Made of recyclable PET aligning with sustainable trends and enhancing your brand's green and responsible image.

Reliable Per formance

Maintains good vacuum insulation and durability en-suring for mula-tion stability during storage and transportation.

LOTION BOTTLE

Lotion bottle
One click POP CAP Bottle

200ml/250ml
For skincare persona careMaterial: PP, PE
Easy to open the lid with one hand

Core Advantages

One-Handed convenience

The innovative "one-click pop" design allows instantlid opening with a simple press or push-no twisting olstraining required, This is ideal for users with limiteddexterity (e.g.. seniors, pregnant individuals) or high-speed scenarios (e.g., driving, exercising), where quickaccess is critical.

Branding Through Interactive Design

The tactile "pop" opening action creates a memorable user experience, while customizable lidshapes (e.g., ergonomic curves, neon finishes) make abold visual statement. This suits trendy beverages, indie cosmetics, and limited-edition products aiming for shelf standout.

Toner bottle with twist hole

100ml to 400ml
For skincare and personal care
Material: PP, PE
New design with recognition

Core Advantages

Precision Dosage control

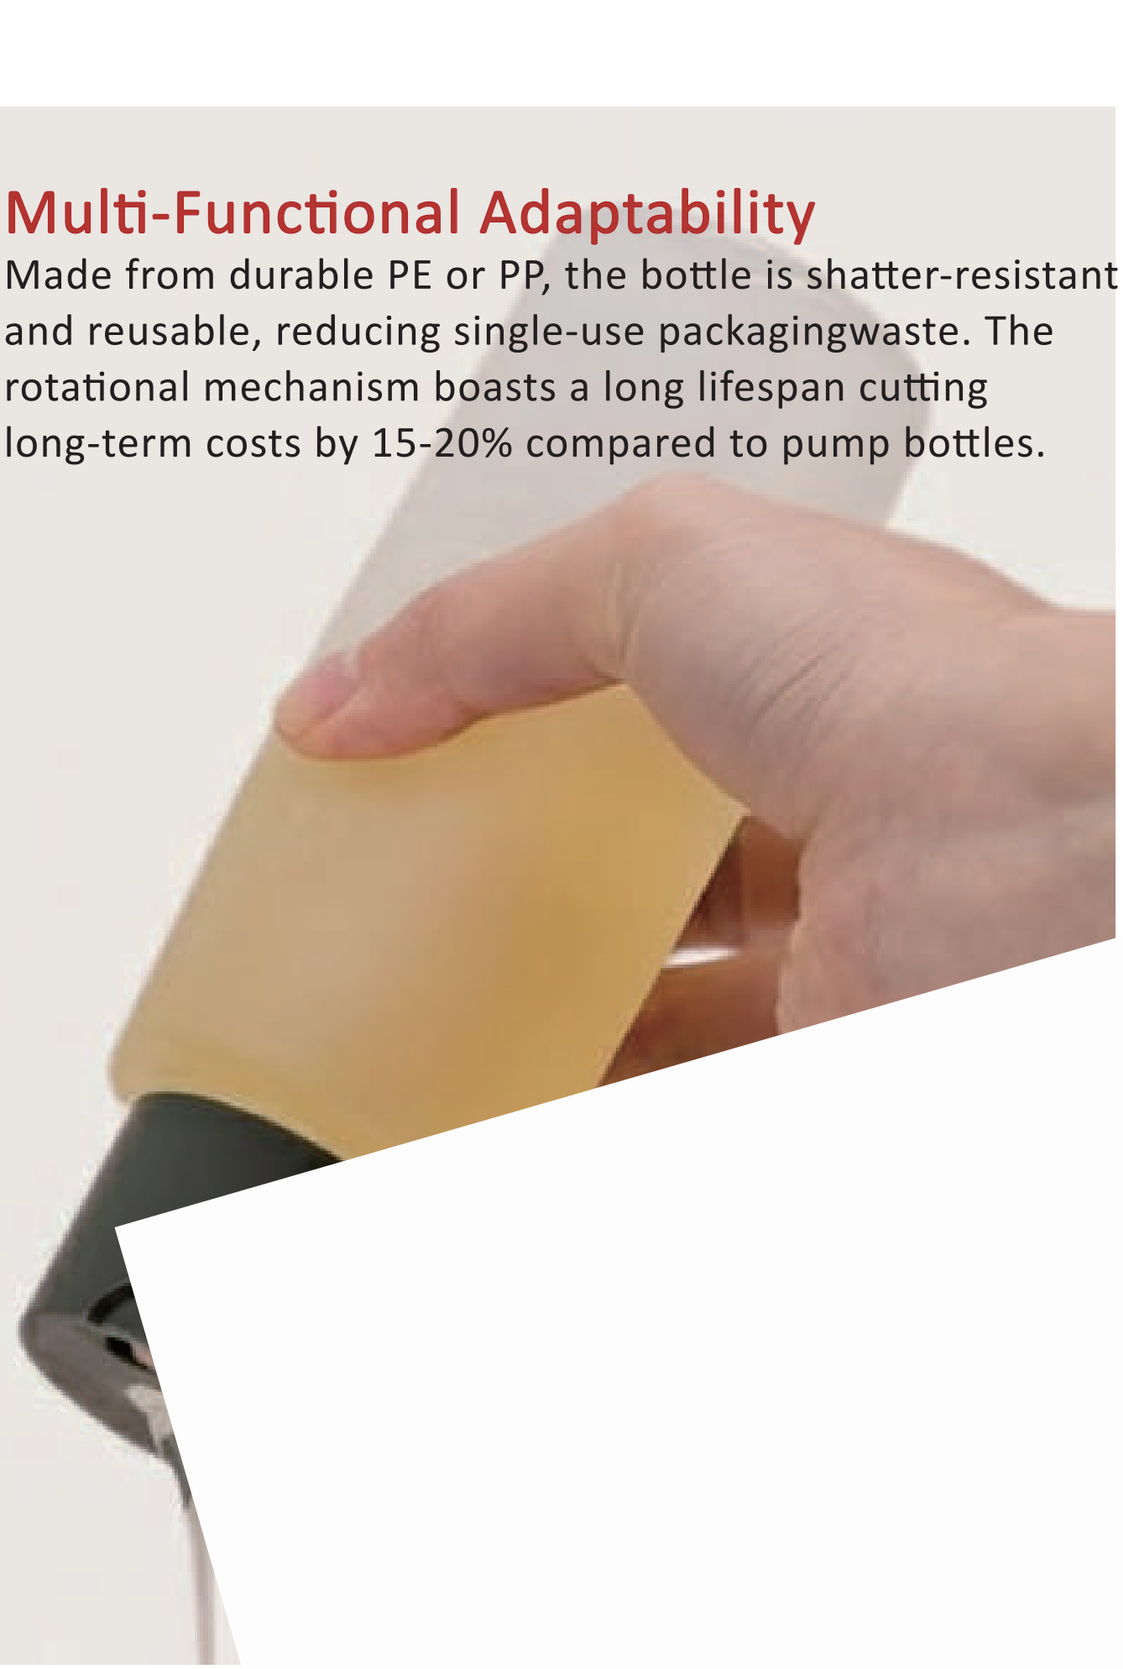

The twist-hole design allows adjustable openings(micro, medium, large) for precise liquid dispensing: micro holes suit gentle patting oftoner, medium holesare ideal for soaking cotton pads, and large holesenable quick pouring. This prevents over-pouring and leakage common in traditional open-mouth bottles, especially for high-value essence waters or stepsrequiring exact dosage.

Multi-Functional Adaptability

The same bottle can switch between dispensing modes via rotation, accommodating various textures like toners, serums, and lotions (lotions require tilting for flow). It even works for decanting shampoos orshower gels, catering to diverse daily and travel needs.

Multi-Functional Adaptability

Made from durable PE or PP, the bottle is shatter-resistant and reusable, reducing single-use packagingwaste. The rotational mechanism boasts a long lifespan cutting long-term costs by 15-20% compared to pump bottles.

Soft touch Tonerbottles

60ml to 250m
For skincare and personal care
Material: PP, PE
Squeezable, flip cap with recognition

Core Advantages

Skin-Friendly Tactile Experience

Th e features a soft-touch coating or elastic sili-
erial, ofering a warm, velvety grip that pre-
ing, especially for wet hands in bathrooms.
avoids the coldness of glass orthe cheap feel
hancing the premium perception of
care products.

istant Durability

terial absorbs impact, remaining intacte-
ed from 1.5 meters. This minimizes
e skincare caused by bottle breakage,
for home use, travel, andother dy-
ts.

Customizable Design for Brand Alignment

Features like embossed logos, gradient soft-touchcoat-ings, or ergonomic shapes (e.g.. curved contourspeb-ble-like forms) align with luxury brands' "tactile aesthet-ics," enhancing shelf visibility and creating memorable grip experiences for users

Soft Geometry

500ml, 600ml,750ml, 800mlPET

Advantages

Soft Curves

These containers take soft curves as the core design-highlight. The smooth and elegant lines are highly visually attractive and also improve holding comfort.

Highly Recognizable

The unique curves integrate with vivid colors andtextured materials to form highly recognizable brandvisual symbols, making the products stand out in the same category.

Aesthetic Charm

They not only satisfy storage and usage demands but also reinforce brand memory through the 1 coniccurves, combining practicality with brand aestheticcharm.

ROLLON

B

No.1 Automatic line of PET roll-on bottle

30ml to 100ml
For skincare and personal care
Material: PP, PE, Glass

Core Advantages

Precision Application & Gentle Spread

The roll-on design controls liquid flow through skin contact, preventing waste from traditional pour-style packaging. Ideal for products requiring even application, such as facial oils or roll-on perfmes. itensures gentle, non-irritating use.

Portable, Hygienic & Leak-Proof

A tight-fitting rollerball creates a secure seal, preventing leaks when inverted and making it perfectfor on-the-go use. Glass models offer premium (texture) and chemical resistance, while plastic variants are lightweight and shatterproof, catering to diverse needs.

Multi-Scenario Versatility & Enhanced Experience:

The rollerball's massaging efect boosts absorption (e.g.eye serums) or provides a cooling sensation (e.g..antiperspirants), elevating user experience, ransparent bottles allow easy monitoring ofproduct levels.

R01

POWDER BOTTLE

Standout Doble–Wll PET Vacuum Bottles

Eco–Friendly Packaging for Brand Differentiation
80ml and 120ml

Key Advantages

Unique Visual Appeal

Double-wall PET creates a distinctive wrinkled innerliner, especially eye-catching for colored formulationsto grab consumer attention.

Effective Brand Differentiation

The one-of-a-kind texture acts as a unique brandmarker, setting your products apart from competitors in the market.

Eco-Friendl

PB01

BOTTLE FOAM

Foam bottle

PP, PE, PET80–250mlDischarge rate: 0.4/0.8/1.2/1.6ccSqueezable and soft touch
Customization: Spray color,injection color, silk print, hot stamp,electroplate

Core Advantages

Hassle-Free Foaming for Effortless Use

The pump dispenses fine, rich foam directly, eliminating the need for manual lathering and saving up to 30% product (e.g., facial cleanser). Ideal for fast-paced life-styles or users with limited hand mobility.

Gentle Cleansing with Reduced Irritation

The light, airy foam glides smoothly over skinavoiding the harsh rubbing required with traditional liquid formulas. Perfect for sensitive skin and babycare products.

Versatile for Diverse Scenarios

Works with various textures (liquids, concentrates) for facial cleansers, body washes, hand soaps, and even pet-grooming products, ofering multi-use convenience.

300mI PET

Foam bottle

Advantages

Recognizable Triangular

This foam pump bottle boasts a highly recognizable triangular (conical) bottle body, allowing it to quicklystand out from various containers.

Precise Dosage

The transparent material enables visual inspection of the remaining quantity, and the press pump head effortlessly generates dense foam, ensuring precise dosage control and liquid conservation.

Hand Soap and Facial Cleanser

It is lightweight and portable, and moreover, refillable-making it both environmentally friendly and practical
When used for dispensing items like hand soap and facial cleanser, its unique shape not only renders it easy to use but also makes it memorable.

SPRAY BOTTLE

Even Mist Avoids Drips,
Enables Deep Absorption

Fine Spray Solutions for Makeup Setting & Skin

Core Advantages

It is mainly applied to makeupsetting sprays and essencesprays

Fine and Uniform Spray

The nano-level fine mist is evenly distributed, ensuring a comfortable use rexperience without water droplet condensation or uneven spraying.

Rapid Penetration and Absorption

The ultra-fine mist quickly penetratesinto fibers or deep skin layers. Formakeup setting sprays, it enhancesmakeup longevity by adhering to theskin evenly; for essence sprays, it enables deep absorption of nutrients, optimizing skincare efficacy.

High Density Mist Sprayer

Custom rounded corners
30ml,50ml.100ml.120ml

Advantages

Excellent atomization

High-density spray design turns liquid into uniformfine mist with wide coverage and strong adhesion,avoiding waste from dripping. Ideal for toners, settingsprays, etc.

Safe & comfortable to use

Custom rounded corners eliminate sharp edgesensuring a smooth grip, reducing collision damage andskin scratch risks.

Flexible capacity options

3oml/50ml/100 ml/120 ml available. Small sizes30 /50ml) are travel-friendly； large sizes (100/120ml) meet daily long-term use needs.

Strong compatibility

Works with various liquid skincare (e.g.. moisturizing toners, serums and makeup products, offering high versatility for flexible content matching.

TUBE

TB01

D19 Tube Multiple options

Suitable for : Lip balm, lip gloss, concealer, eye cream
Tube diameter:19mm
Filling volume: 8ml–25ml
Tube material: PE, PCR, 2–layer or 5–layer
Cap material:PP
Applicator material: PP, Silicon, Stainless steel, Flocking, PP
Decoration: Logo and printing custom service

Core Advantages

Versatile Material Choices

Available in PE, PCR plastic, and sugarcanebioplastic: PE offers flexibility and durability. PCR plastic is recyclable and eco-firiendly, aligningwith sustainability goals. Sug-arcane bioplastic provides a natural, green optionfor brands prioritizing safety, environmental responsibility, and texture.

D40mmTube Multiple options

Length: 85–190mm
Tube diameter:40mmFilling volume: 70mi–180ml
Tube material: PE, PCR, 2–layer or 5–layer
Cap material: PP
Applicator material: PP, Silicon, Stainlesssteel, Flocking， PP
Decoration: Logo and printing custom service

Core Advantages

Diverse Material Options

Common materials include PE/PCR (for the tube body) and PPfor the cap), allowing flexible selection based on applcation needs. For example, PE is soft and flexible, ideal for product packaging requiring frequent squeezing; PCR offers higher hardness and wear resistance, suitable for industrial scenarios demanding strength. Single-layer, double-layer, or five-layertube structures are also available to meet different requirements for barrier properties and durability.

Strong Versatility

As a common tube diameter specification, the D40mm tube enjoys wide market versatility. It is easily accessible and compatible with other standard components reducing procurement and assembly complexity.

Optimal Size Compatibility

With a diameter of 40mm, the tube fits well with various supporting components and product specifications across numerous applications. It avoids the limitations of too small a diameter (restricting flow or capacity) and the drawbacks of excessive size (unnecessary space occupation or cost increase).

Special Application Scenarios

High-End Skincare and organic Cosmetics

Core Advantages

Sustainability and Environmental Attributes

Plant-Derived Raw Materials

Main components are sourced from renewable plant resources (such as corn,sugarcane, and other biomass),reducing dependence on petroleum-based plastics and lowering carbon footprint.

Degradability

Some products support industrial composting or home degradation,minimizing plastic pollution.

Low-Carbon Production

Lower energy consumption during production. and the possibility of achieving a "negative carbon" goal through carbon capture technology.

Innovative Sponge–Tip– Cosmetic Tubes

Elevate Your Blush & Makeup Linewith Precision & Appeal

Key Advantages

Precision & Flawless Finish

Integrated sponge tip enables smooth, even blending of blush for anatural look, catering to consumers' demand for hassle-free makeup.

Distinctive Brand Edge

Unique sponge-tip design stands out from traditional tubes, shaping a trendy, creative image to set your products apart.

Hygienic & On-the-Go

Eliminates extra brushes to reduce contamination; compact size fits travel and quick touch-ups for busy users.

Durable & Formulation-Safe

High-quality tube and sturdy sponge ensure long-term use while protecting the integrity of your cosmetic formulas

JAR

Replaceable Airless Jar

30ml–100ml
Press out the liquid, no contamination
Replaceable
Airless Bottle

Core Advantages

Eco-Friendly Replaceable Design

The jar body is separated from the inner cartridge,Afer use, only the cartridge needs to be replaced, reducing packaging waste and lowering both costsand environmental impact.

Vacuum Preservation Technology

The airtight vacuum environment effectively is olates oxygen and bacteria,extending the shelf life of contents especially ideal for high-activity ingredients (e.g..serums, skincare products).

Precision Dosage Control

The pump-head design ensures stable, consistent dispensing with each press, minimizing waste and maintaining product hygiene, making it suitable for frequent use.

Special Application Scenarios

Beauty & Personal Care

High-End Skincare (e.g.. serums, creams, eye creams): The vacuum environment protects active ingredients (e.g.. VC, peptides) from oxidation, while replaceable cartridges reduce consumer repurchase costs.

Medical & Health

Topical Medications (e.g.. horonal ointments,antibacterial gels): Vacuum isolation prevents contamination, and replaceable cartridges reduce medical supply waste.

Maternal & Infant Care

Baby Skincare (e.g., diaper rash creams, baby lotions): Vacuum protection prevents contamination.and replaceable cartridges avoid whole-jar waste, suitable for delicate infant skin.

Replaceable Jar

30ml,50ml,100ml
Inner jar can be PET, recyclable
For skincare,homecare
Replaceable

Core Advantages

Eco-Friendly & Cost-Effective

The jar body is separated from inner cartridges/refills. Only the inner core needs to be replaced after use, reducing packaging waste and lowering users' repurchase costs.

Multi-Functional Design

Supports features like airtight sealing, light protection,and moisture resistance, meeting storage needs forvarious contents (e.g., oxidation-prone ingredients oruse in humid environments).

Precision Dosage Control

The pump-head design ensures stable, consistentdispensing with each press, minimizing waste and maintaining product hygiene, making it suitable for frequent use.

Special Application Scenarios

Beauty & Personal Care

Skincare and cosmetics: Refillable design reduces plastic waste, with reusable jars promoting sustainability.

Medical & Health

Medical supplies (e.g., sterile cotton balls, gauze): Sterile-packaged inner cartridges allow direct replacement, suitable for home care or clinic settings.

Flip Cap Jar

80–150ml
Flip cap
PET jar
For make up, skincare

Core Advantages

Convenient Flip-Top opening & Airtight Sealing

The flip cap design enables one-handed operation forquick access, while the sealing mechanism prevents leaks or moisture ingress, making it ideal for frequent use.

Flexible Adaptability

The universal jar body accommodates inner cartridges of various specifications (liquids,pastes,powders), suitable for diverse products like skincare.pharmaceuticals,and food.

Special Application Scenarios

Beauty & Personal Care

The flip-top design allows one-handed use of bathroom skincare products (e.g.. hair masks, body lotions) for convenience, while refillable cartridges reduce plastic waste. Portable men's aftershave balms/shaving foams with replaceable inner cartridges are ideal for travel.

Sports & Outdoor Activities

Waterproofflip-top containers with vacuum-sealedcartridges store energy foods (e.g.. nut butter, electrolyte gummies) to prevent leaks and moisture, suitable for hiking, cycling, and other outdoor activities. Flip-top portable hand sanitizers/disinfectant wipes with refills reduce carrying weight.

J03

Pp Jar – Reclycleable

60ml
PP
For make up, skincare

Core Advantages

Eco-Friendly Recyclability

Made from polypropylene (PP), it meets international recycling standards and can be professionally recycled to reduce plastic pollution.

Chemical Resistance & Stability

Resistant to acids, alkalis, oils, and other chemicals, it is not easily deformed or coroded, making it suitable for storing highly active or corrosive contents.

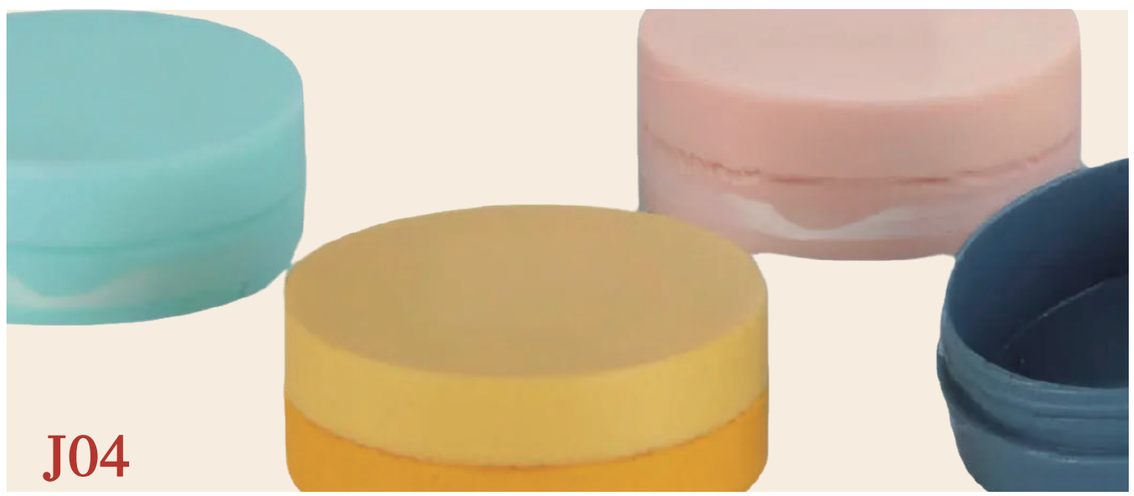

Special Application Scenarios

Medical & Healthcare Industry

Used for packaging pharmaceuticals. PP's chemicalresistance and stability ensure safe storage of medicines, while the iars can be heat-sterilized tomeet medical-grade packaging standards. The recyclable design also reduces medical waste disposal pressures.

Beauty & Personal Care Industry

Suitable for lotions, creams, scrubs, and other products, it resists chemical components in cosmetics (such as alcohol and essential oils)without corrosion.
The recyclable feature fits the "zero waste" beauty concept-for example, eco-brands' solid shampoo and conditioner jars, which can be refilled or recycled after use.

Glass jar
50ml
PP inner jar
PP cap or ABS cap

Dual layers

Core Advantages

Eco-Friendliness and Reusability

Glass is 100% recyclable and can be reused multiple times without losing its quality.

Aesthetic Appeal and Branding

Glass has a premium, elegant look that enhances the perceived value of the product. Its transparency allows consumers to see the texture and color of the cream, while smooth surfaces provide an ideal canvas for custom labeling, embossing, or printing, helping brands stand out on shelves.

Special Application Scenarios

Skincare Products

They are widely used for facial creams, moisturizers, night creams, eye creams, and facial masks.

Organic and Natural Products

Brands focusing on organic, natural, or clean beauty often prefer glass packaging to align with their eco-friendly and safe branding ethos.

Luxury Cosmetics

High-end skincare lines utilize glass jars to convey asense of luxury and quality, appealing to consumers seeking premium products.

Innovative Airless Jar

Pencil sharperner–shaped
For cleansing balm and makeup remover Eraser

Advantages

Innovative Design

Pencil sharpener shape is eye-catching, enhancing product differentiation and brand memorability; eraser-like top is easy to grip for opening/closing.

Airless Protection

Prevents cleansing balm/makeup remover from oxidation and contamination, maintaining product efficacy and extending shelflife.

SWIRL JAR

300ml
PET and PP

Advantages

Core Design

This "SWIRL JAR" features unique spiral textures as its core design, with agile and rhythmic lines. It not only enhances visual recognition but also improves anti-slip grip and tactile pleasure during handling

Differentiated Brand Image

The combination of vivid colors and iconic textures shapes a differentiated brand image, making it stand out among similar products.

Sub-packaging and Storage

Moreover, its compact and delicate shape facilitates portability, meeting needs for sub-packaging and storage, and integrating practicality with brand quality

J07

DROPPER

Low Volume Dropper

3ml,5ml,7ml,10ml,15ml
Aluminum,ABS,Glass,Rubber
For skincare,personal care,homecare

Core Advantages

Precision Dosage Control

The dropper design allows precise measurement of each use (e.g., 0.1-1ml), minimizing waste, especially for high-concentration or expensive ingredients (e.g. serums, pharmaceuticals).

Portability &Ease of Use

Compact and lightweight, it can be operated with one hand, making it suitable for on-the-go use or frequent applications(e.g., skincare products, infant medications).

Special Application Scenarios

Medical & Healthcare

Ideal for infant medications and topical drops, with clear graduations to prevent overdosage and reduce cross-contamination risks.

Laboratory & Research

Used for micro-sampling of chemical reagents and adding cell culture media, ensuring precise operation in sterile environments.

Food & Health Products

Suitable for children's nutritional drops and flavoring essential oils to ensure measured supplementation or seasoning, avoiding excessive pouring.

Pet Care

Used for pet flea drops and nutritional oral liquids to accurately control dosage by weight, with convenient and safe administration.

D01

Press and Squeeze droppers

Size 18,20,22,24
Ribbed or Smooth · For skincare, personal care
Material:PP,PE,glass,rubber

Core Advantages

One-Handed Convenience

The press or squeeze design eliminates the need for twisting caps, allowing seamless one-finger operation for quick dispensing in scenarios like driving or outdoor activities.

Leak-Proof Sealing

Automatically seals after suction, preventing leaks even when inverted, making it ideal for on-the-go use in makeup bags, gym bags, or tilted environments.

Enhanced Dosage Precision

Controls drop speed via pressing force, minimizing the "drip variation" of traditional droppers-critical for dose-sensitive applications like infant medications or lab experiments.

Glass dropper

20ml–50ml
For Skincare,homecare
Sprayer color

Core Advantages

High Purity & Stability

Glass is chemically inert, resistant to acids, alkalis, oils, and highly reactive compounds. It poses no risk of plasticizer migration, making it ideal for storing sensitive substances.

Transparent Visibility

The fully transparent design allows easy monitoring of liquid color, concentration changes, and remaining volume, ensuring precise dosage control.

Airtight Sealing &Premium Aesthetics

Paired with rubber/silicone bulbs for airtight sealing, preventing evaporation or contamination. The clear glass enhances product perceived value, suitable for luxury applications.

Eco-Friendly & Recyclable

Glass is 100% recyclable, aligning with sustainability goals and reducing single-use plastic waste.

STICKER

Sticker

5ml–75ml
For Skincare
homecare Bottom fill and up fill

Core Advantages

Portable & Leak-Proof

The solid balm remains stable in compact packaging, eliminating the risk of leakage common in liquid perfumes. Ideal for on-the-go fragrance touch-ups.

Precise Dosage Control

Applied by gentle rubbing, it allows users to adjust fragrance intensity accurately, avoiding the overpowering scent from excessive spraying. carvings or patterns, combining decorative appeal with collectible value.

Special Application Scenarios

Business &Social Settings

Sleek and compact solid perfumes allow professionals to refresh their fragrance discreetly, enhancing professionalism with subtle scents that avoid disturbing others.

Travel & Outdoor Activities

Lightweight and leak-proof, they fit easily into cary-ons, keeping users fresh during hiking or camping trips without liquid baggage restrictions.

Sensitive Skin Care

Alcohol-free solid balms with natural ingredients cater to sensitive skin, providing pleasant fragrance while minimizing irritation for daily use.

Niche Customization & Gifts

Uniquely shaped balms with personalized engravings make thoughtful gifts for festivals or anniversaries,conveying heartfelt messages through design.
